RECENT WORKS

WEB & MOBILE APPS DEVELOPER IN BULBERA   01/19-NOW

With the opportunity to work with a cohesive and professional team in this job I have faced a lot of awesome projects, multiple challenges, and problem-solving.
Some of my responsibilities:

- Creating advanced projects starting from building UI design mockups based on client specifications, to development of finalized ReactJS / React Native projects.
- Improving and creating new versions of existing projects using different front-end frameworks: BackboneJS and Angular 4.
- Creating and supporting WordPress websites.
- Bugs fixing and problem-solving on front-end and back-end frameworks.
- Team support.

WORDPRESS / WOOCOMMERCE THEME MODERATOR   01/19-04/21

The creation and support of my WordPress marketplace website by fully modifying a woo-commerce theme was a great opportunity to use my early development skills and work with clients.
Some of my responsibilities:

- Writing CSS
- Modifying PHP code
- Modifying JS code
- Migrating DB from localhost to server
- SSL setup
